

Production Time Entry

The MDP (Mono-Direction Processing) Production Time Entry allows real time capture of the shopfloor production activity

OUR PRODUCTION TIME ENTRY CAN:

- Allow the shopfloor technicians to record their time spent on production orders using a mobile device
- Easily see the materials needed for their production process
- Keep track of time logged on a production order
- Keep track of materials picked and consumed
- Record outputs and know where to send the items to the next routing
